

# INEGRATED ACADEMIC STUDIES OF MEDICINE

FIRST YEAR

# Course title

# **BIOLOGY**

ECTS: 3

Number of active teaching hours (weekly): 3 (2 lectures teaching classes, 1 practical class)

## **TEACHERS AND ASSOCIATES:**

|    | First name and surname       | Email                     | Academic title      |
|----|------------------------------|---------------------------|---------------------|
| 1. | Olivera Milošević-Djordjević | olivera@kg.ac.rs          | Full Professor      |
| 2. | Vladislav Volarević          | drvolarevic@yahoo.com     | Full Professor      |
| 3. | Biljana Ljujić               | bljujic74@gmail.com       | Associate Professor |
| 4. | Danijela Todorović           | dtodorovic@medf.kg.ac.rs  | Associate Professor |
| 5. | Marina Gazdić Janković       | marinagazdic87@gmail.com  | Assistant Professor |
| 6. | Danijela Cvetković           | c_danijela@yahoo.com      | Assistant Professor |
| 7. | Nikolina Kastratović         | n_kastratovic@outlook.com | Facilitator         |

# **COURSE STRUCTURE:**

| Module | Name of the course module                   | weeks | Teaching<br>Lectures<br>(weekly) | Practice<br>(weekly) | Teacher – in<br>charge                    |
|--------|---|-------|----------------------------------|----------------------|---|
| 1      | Cell biology. Reproduction and development. | 5     | 6                                | 3                    | Prof. dr Olivera Milošević-<br>Djordjević |

 $\Sigma 30+15=45$ 

#### **Examination Methods:**

The grade is equivalent to the number of points earned (see tables). Points are earned in two ways:

#### **ACTIVITY DURING THE CLASSES:**

In this way, the student earns up to 30 points, by answering 3 questions from that week's classes at the practical classes and, in accordance with the demonstrated knowledge, gaining from 0 - 6 points.

#### FINAL EXAM:

The student takes the final test during the exam period. In this way, the student can acquire 70 points, according to the attached grading scheme.

| Module |  | Maximal number of points    |            |     |
|--------|--|-----------------------------|------------|-----|
|        |  | Activity during the classes | Final test | Σ   |
| 1      | Cell biology<br>Reproduction and development | 30                          | 70         | 100 |
|        | Σ  | 30                          | 70         | 100 |

#### **Determination of final grade:**

To pass the exam, the student must earn the minimum of 51 total points and to fulfill the following:

- 1. to earn more than 50% points on activity during classes
- 2. to earn more than 50% points on the final exam, which includes total teaching material.

#### **Grading system**

| Final grade | Total number of points Points grade | Description        |
|-------------|-------------------------------------|--------------------|
| 10          | 91 – 100                            | Excellent          |
| 9           | 81 – 90                             | Exceptionally good |
| 8           | 71 – 80                             | Very good          |
| 7           | 61 – 70                             | Good               |
| 6           | 51 – 60                             | Passing            |
| 5           | < 51                                | Falling            |

## **FINAL EXAM**

# FINAL TEST

0-70 points

#### **GRADING OF THE FINAL TEST**

The test includes 35 questions. Each question is worth 2 points.

## LITERATURE:

| Authors       | Publisher  | Library of faculty   |
|---------------|--|--|
| Epstein J.E.  | Cambrige University press, UK, 2003.                               |  |
| Balinsky B.I. | 5 <sup>th</sup> edition , Saunders College,<br>Philadelphia, 1981. |  |
|               | Epstein J.E.   | Cambrige University press, UK, 2003.  Epstein J.E.  5 <sup>th</sup> edition , Saunders College, Philadelphia, 1981 |

All lectures and material for small group work are available on the website of the Faculty of Medical Sciences: www.medf.kg.ac.rs

#### PROGRAM OF LECTURES

#### WEEK - 1:

#### ORGANISATION OF PROKARYOTE AND EUKARYOTE CELLS-CELL ORGANELES

| Teaching lectures (2 classes)   | Practical class (1 class)  |
|---|--|
| Difference between prokaryotic and eukaryotic cells. Organization of eukaryotic cells. Cytoplasm, nucleus, mitochondria, ribosomes, endoplasmic reticulum, Golgi apparatus, lysosomes, cytoskeleton, peroxisomes, centrioles, cilia and flagella. | Difference between prokaryotic and eukaryotic cells. Organelles of prokaryotic and eukaryotic cells. Examination |

#### CELL MEMBRANE, TRANSPORT OF MOLECULES ACROSS THE CELL MEMBRANE

| Teaching lectures (2 classes)                     | Practical class (1 class)                          |
|---|--|
| Cell membrane-plasma membrane. Transport small    | Cell membrane – structure and transport molecules. |
| molecules across the cell membrane. Transport of  | Examination  |
| macromolecules, small molecules, endocytosis, and |  |
| exocytosis.                                       |  |

#### **NUCLEUS**

| Teaching lectures (2 classes) | Practical class (1 class)   |
|-------------------------------|---|
|                               | Nucleus-structure of the nucleus, role in the inheritance process.  Examination |

#### WEEK - 2:

#### CHEMICAL COMPOSITION OF THE CELL

| Teaching lectures (2 classes)   | Practical class (1 class)                     |
|---|---|
| Chemical composition of the cell - important chemical elements, water, and organic compounds. | Chemical composition of the cell. Examination |

#### NUCLEIC ACIDS-DNA AND RNA

| Teaching lectures (2 classes)   | Practical class (1 class) |
|---|---------------------------|
| Structure and function of DNA molecule. Denaturation and renaturation of DNA - hybridization. Types of DNA sequences. RNA molecule-a type of RNA molecules and their roles. | Examination               |

#### REPLICATION OF DNA. GENETIC CODE, CODON, ANTICODON

| Teaching lectures (2 classes)   | Practical class (1 class)                                      |
|---|--|
| Replication of DNA molecules-enzymes in the process of replications, mechanism of DNA replication. Transitions and transversions in DNA molecule. Genetic code, codon, anticodon. | DNA molecule replication-animation of replication. Examination |

#### WEEK - 3:

#### PROTEIN SYNTHESIS -TRANSCRIPTION

| Teaching lectures (2 classes)                        | Practical class (1 class)  |
|--|--|
| RNA transcription - steps in RNA synthesis molecule. | RNA transcription - steps in RNA synthesis molecule. Examination |

#### PROTEIN SYNTHESIS -TRANSLATION

| Teaching lectures (2 classes)                    | Practical class (1 class)   |
|--|---|
| Translation - stages in the translation process. | Translation - stages in the translation process, animation of translation.  Examination |

#### REGULATION OF TRANSCRIPTION AND TRANSLATION

| Teaching lectures (2 classes)   | Practical class (1 class)                    |  |
|---|--|--|
| Regulation of transcription- pretranscriptional, transcriptional and post-transcriptional level. Regulation of translation. | Regulation of protein synthesis. Examination |  |

#### <u>WEEK − 4</u>:

#### REPRODUCTION OF MOLECULES, BACTERIA, VIRUSES AND CELLS

| Teaching lectures (2 classes)  | Practical class (1 class)  |  |
|--|--|--|
| Reproduction of molecules in the cell. Reproduction of bacteria. Reproduction of viruses.  Mitosis-karyokinesis and cytokinesis. Modifications of mitosis. Animation of mitosis. | Reproduction of molecules, bacteria and viruses. Cell division mitosis.  Examination |  |

# REPRODUCTION BY GAMETES, PHASES IN GAMETOGENESIS, MEIOSIS AND THE SIGNIFICANCE OF MEIOSIS

| Teaching lectures (2 classes)   | Practical class (1 class)                       |  |
|---|---|--|
| Reproduction of organisms. Gametes. Phases of gametogenesis. Meiosis. | Meiosis. Gametes and gametogenesis. Examination |  |

#### **SPERMATOGENESIS**

| Teaching lectures (2 classes)  | Practical class (1 class)  |  |
|--|--|--|
| Spermatogenesis, spermiogenesis, structure of sperm, sperm biology, hormonal regulation of spermatogenesis, anomalies spermatogenesis. | Spermatogenesis, spermiogenesis, structure sperm, sperm biology, hormonal regulation of spermatogenesis, anomalies spermatogenesis.  Examination |  |

#### <u>WEEK – 5</u>:

#### **OOGENESIS**

| Teaching lectures (2 classes)                                      | Practical class (1 class)   |  |
|--|---|--|
| Mammalian oogenesis, ovum biology, sexual cycle of female mammals. | Mammalian oogenesis, ovum biology, sexual cycle of female mammals.  Examination |  |

#### FERTILIZATION IN MAMMALS

| Teaching lectures (2 classes)   | Practical class (1 class)  |
|---|--|
| Fertilization, fertilization in mammals, modifications fertilization process. | Fertilization, fertilization in mammals, modifications fertilization process.  Examination |

#### EMBRYONIC DEVELOPMENT OF MAMMALS

| Teaching lectures (2 classes)  | Practical class (1 class)   |  |
|--|---|--|
| Developmental biology - morula, blastula, gastrula.<br>Organogenesis. Embryonic formations in mammals. | Developmental biology - morula, blastula, gastrula. Organogenesis. Embryonic formations in mammals. Examination |  |

# WEEKLY COURSE SCHEDULE

| COURSE                                    | WEDNESDAY   | THURSDAY                           | FRIDAY                             |
|---|---|------------------------------------|------------------------------------|
| BIOLOGY<br>from 06.12. to 12.01.<br>(2+1) | LECTURES<br>08:00 - 11:45<br>14:10 - 14:55<br>(H44) | PRACTICE<br>08:00 - 11:00<br>(H44) | PRACTICE<br>08:00 - 11:00<br>(H44) |
|   | PRACTICE<br>15:00 - 18:00<br>(H44)                  |                                    |                                    |

#### LECTURES AND PRACTICAL CLASSES

| Module | Week | Type         | Teaching and practice lectures   | Teacher  |
|--------|------|--------------|--|--|
|        |      |              | Organization of cells of prokaryotes and eukaryotes-cellular organelles  | Prof. dr Vladislav Volarević                                 |
| 1      | 6    | L            | Cell membrane-structure, transport of molecules across the cell membrane | Prof. dr Vladislav Volarević                                 |
|        |      |              | Nucleus  | Prof. dr Vladislav Volarević                                 |
|        |      |              | Organization of cells of prokaryotes and eukaryotes-cellular organelles  | Prof. dr Vladislav Volarević                                 |
|        |      |              |  | Mr. ph. Nikolina Kastratovic                                 |
| 1      | 6    | P            | Cell membrane-structure, transport of molecules across the cell membrane | Prof. dr Vladislav Volarević<br>Mr. ph. Nikolina Kastratovic |
|        |      |              | -  | Prof. dr Vladislav Volarević                                 |
|        |      |              | Nucleus  |  |
|        |      |              |  | Mr. ph. Nikolina Kastratovic                                 |
|        |      |              | Chemical composition of the cell   |  |
|        |      |              |  | Prof. dr Vladislav Volarević                                 |
