
Juan Carlos Izpisúa Belmonte, Ph.D.
Professor, Salk Institute for Biological Studies
Director, Center of Regenerative Medicine in Barcelona

May 28, 2010

I have great pleasure in providing this letter supporting the application of Professor Miodrag Stojkovic for funding to support the creation of a stem cell research and banking institute at the medical school of Kragujevac, Serbia. I hope that we can collaborate to establish a more detailed examination of the molecular mechanisms regulating adult cell reprogramming, embryonic stem cell differentiation and develop methods to improve cell transplantation and regenerative medicine.

Sincerely,

Juan Carlos Izpisua Belmonte
