University of Kragujevac,
Serbia

Attention: Professor Miodrag Stojkovic

Reference: International Collaboration

Seville 9th June 2010

Dear Prof. Stojkovic ,

I understand that you are in the process of setting up a new institute dedicated to Stem Cells Research in Kragujevac, Serbia. You have my strong support in this endeavor and I see a mutually shared interest in biology of Stem Cells as my Centre is also involved in regenerative medicine. Through this Letter of Intent, I wish to establish collaboration in the areas of Medical and Life Sciences research between our two institutes. I hope this collaboration will strengthen and facilitate postgraduate student exchange between our centres, stimulate research collaboration and increase our competitiveness in attracting external funding and resources.

Hopefully, this will lead to a strong common research environment in both centres that are successful in competing for funds both at National and European level.

I wish you all the success with your future research plans.

With kind regards,

Shom Shanker Bhattacharya

Director
